

## Penetrant Testing

*Product information*

*MR<sup>®</sup> 311-R - biodegradability*

## Biodegradability MR<sup>®</sup> 311-R Penetrant red

---

### General:

MR<sup>®</sup> 311-R Penetrant red was tested regarding biodegradability by an independent institute, using the "Zahn-Wellens" method.

### Result:

- The wash water containing MR<sup>®</sup> 311-R Penetrant red is 98 % biodegradable if it contains max. 1 % of pure MR<sup>®</sup> 311-R.

### Our customers´ advantages:

- Once the local operator of the purification plant grants permission, the wash water from excess penetrant removal may be lead into the drains.
- The mixing with further waste waters which may occur in your house needs additional examination prior to discharge of sewage!
- Waste water treatment can be dispensed with, thereby reducing costs.

### Our recommendation:

- Ask for a copy of the test report and further documentation for presentation at your local operator of the purification plant!

We shall be pleased to assist you.
